

India (18 June 2021)

COVINTS, a leading Indian defense organization, is pleased to announce that it has partnered with AIDENTITY, a global leader in biometric security technologies and solutions to expand its global presence in Europe, Canada, Africa, and the Middle Eastern markets.

With technology revolutionizing and playing an extremely critical role in every aspect of securities, the companies acknowledge the growing need for integrated preventive solutions for ever-growing threats the world faces. The COVINTS-AIDENTITY partnership brings together experience in business strategy, technology development, and deployment to help support global clients in security and defense as well as industries prone to CBRNE incidents.

With CBRNE threats and security challenges that have become increasingly dynamic and gone beyond the conventional ways of tackling them, technological integration is imperative than ever! CBRNE threats have reached a turning point globally.

The COVINTS-AIDENTITY partnership aims to provide preventive technologies globally and help mitigate CBRNE attacks and incidents. Emerging technologies will increasingly become a part of security strategies in the coming years. This partnership also opens avenues for both companies to work on integrating Biometrics and CBRNE technologies.

“We are thrilled to be partnering with AIDENTITY” said **Swapnil Kishore, Founder & CEO of COVINTS**. CBRNE threats have dynamically outgrown in the past few years and require real-time simultaneous ingenious solutions to proactively mitigate them. COVINTS is dedicated to this cause and I believe this partnership will help us to take this forward”

“Speechless I was when I saw the first time CBRNE platform of COVINTS. Gathering real-time data from multiple sensors, covering Chemical, Biological, Radiological, Nuclear, and Explosive threats into one centralized solution, is a gamechanger in defense systems” says **Johann Caubergh, MD of AIDENTITY**. We are upscaling our mission that stands for the protection and security of high-risk environments and citizens, that makes COVINTS a perfect match in this strategic partnership. We are honored to receive the confidence from COVINTS to represent their company, know-how, and intelligence worldwide.

About COVINTS:

Covert Overt Intelligence Solutions, COVINTS, is an Indian defense company focused on delivering customized turnkey solutions from risk analysis, defense systems, and equipment to training tailored to our customers’ most challenging needs. At COVINTS we pride ourselves on our ability to work under critical situations whilst maintaining superlative standards and delivering optimal solutions.

From Military Equipment to Training, Defense and Crime Science Studies to Research, High-tech Surveillance, and Intelligence Solutions to Access Control, Perimeter, and Ingress Solutions to Ancillary Installation Materials, all integrated with leading-edge Command & Control Intelligence Systems, our teams are focused on delivering essential Counter-Terrorism, Cyber Operations, Intelligence, Crime Science, and C4ISR Solutions to our clientele in the National and International security community.

About Aidentity

Aidentity is a UK-based company with over 20 years of experience in biometric identification solutions and secure documents as an integrator and innovator of new identification applications.

The combination of her award-winning biometric solutions and secure documents makes Aidentity unique in consulting, designing, developing, and integrating innovative and creative identification solutions for Government, Law Enforcement, and Financial Institutions.
